

OVERVIEW

Increase your CRM's functionality by connecting it with an online database of global addresses that help you search, verify and easily add customer addresses to your CRM. What does this mean? you can find and correct any missing element in a residential or business address, saving you the stress of sending products to the wrong address or embarrassing moment of asking a prospect's address more than once.

Key features

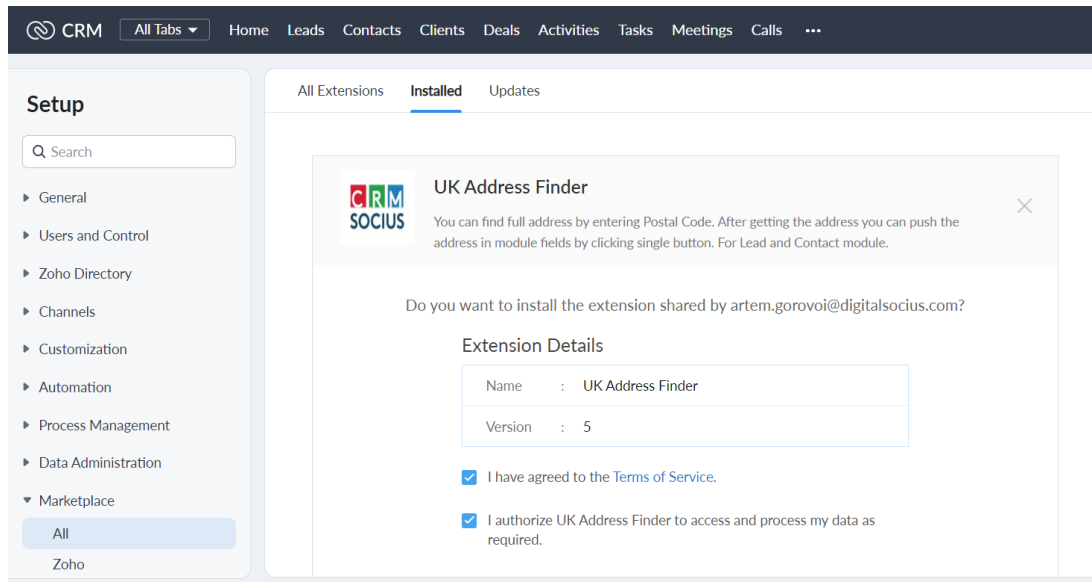

Find addresses based on Zipcode for UK

- Push address to CRM record in standard fields
- This will show Street, City, State and Country field
- All above fields will be pushed to CRM record after clicking push to CRM button

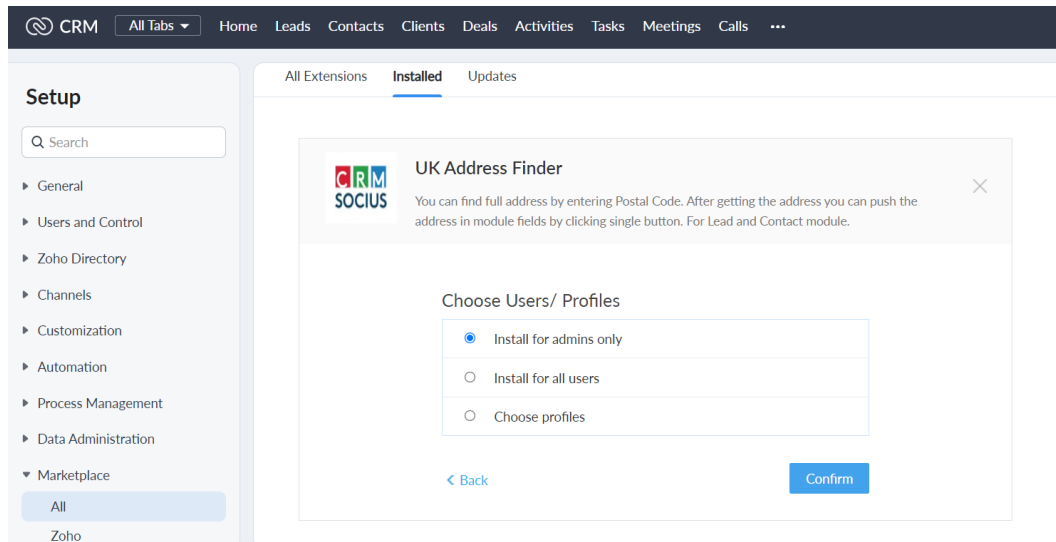

INSTALLATION STEPS

Search for UK Address Finder in Marketplace or click on the link on the website.

1. Click the checkboxes and select Continue

2. Select the users/profiles that should have access to the extension and click on Confirm

The screenshot shows the Zoho CRM interface. At the top, there is a navigation bar with the Zoho CRM logo and a menu of tabs: All Tabs, Home, Leads, Contacts, Clients, Deals, Activities, Tasks, Meetings, and Calls. Below this is a 'Setup' sidebar with a search bar and a list of categories: Zoho Directory, Channels, Customization, Automation, Process Management, Data Administration, and Marketplace. The Marketplace section is expanded, showing 'All', Zoho, Google, and Microsoft. The main content area is titled 'Extension Details' and shows the details for the 'Global Address Finder' extension. The details include: Name (Global Address Finder), Version (3.0), Installed by (artem.gorod@zohocrm.com), Installed date (18 May 2022), Short description (Extension can be use to find address globally by entering the postcode of area.), Status (Active), and Permission (Change Permission). Below the details is a table for 'Installed Components' with columns for Name, Component, and Status.

Name	Component	Status
------	-----------	--------

UNINSTALLATION STEPS
